## What's New & Changed

New features in this release.

### Compatibility With BoKS Manager 6.7.1

This version of BoKS Password Manager is compatible with BoKS Manager 6.7.1. Note that BoKS Password Manager 6.7.1 is not compatible with other versions of BoKS Manager.

## Fixed Issues

Issues that have been fixed in this release.

### #7553

#### LOGIN PASSWORD FIELD TRUNCATES THE PASSWORD

When logging in to the Password Manager, the user password was truncated to 8 characters, as the input field for the password was defined as 8 characters.

In version 6.7.1 the maximum input length for passwords at login is 72 characters.

## Known Issues

Issues identified in this release, with workarounds where appropriate.

### #8872

#### LOGGED OUT FROM SESSION

When you click Redisplay in the List Managed Users page and check users in the Reconcile Users page of the administration GUI you may be logged out and returned to the Login page.

### #8871

#### ERROR 404 BAD REQUEST

An error 404 “Bad request” is returned intermittently when using the BoKS Password Manager administration GUI.

**WORKAROUND:** If you encounter this error the workaround is simply to manually reload the Login page and log in again.

## #464

### UNEXPECTED CHARACTERS RETURNED WITH UTF-8 ENCODED BROWSER

If your browser is set to use UTF-8 encoding, entering certain special characters in the data fields can return 2 or more unexpected characters when you press enter or click a control in the user interface. These unexpected characters are then also included in related log messages.
