

FORTRA

FACTSHEET *(Boldon James)*

Classifier Overview

The best-of-breed data classification solution enabling organisations to better manage and control their data, streamline operational performance and improve return on technology investment

We're entering a new era of data protection – one that promises ever greater protection for data subjects, tighter regulatory oversight and even larger fines for non-compliance.

While data classification offers an increasingly persuasive answer to the questions of unintended data leakage, it doesn't stop here. With Gartner pointing to rapidly growing adoption, the benefits of effectively categorising data go far beyond protection.

Data classification extends the value and efficacy of your wider data security and governance ecosystem – adding new levels of intelligence to data loss prevention and data archiving solutions, to name just two. All of which drives greater levels of return across your data protection investments. Ultimately though, data classification allows data security controls, rules and policies to be more easily and consistently enforced.

1. Engage Users

- Fully customisable interface
- Simple classification label selection
- Single click classification functionality

2. Increase Awareness

- Application of visual markings to documents
- Attachment inventories maintain awareness of original content, even when printed

3. Increase Accountability

- Users are responsible for selecting the appropriate classification based upon their knowledge of the content

4. Optimize Security Technology

- Working with best-of-breed technology providers to deliver data classification as part of a complete solution

KEY BENEFITS

“You can't be following best practice in today's world without doing data classification. Data classification makes efficiencies inevitable... if you are not leveraging classification data, you are working too hard.”

Renee Murphy,
Principal Analyst, Forrester Research Inc.

Classifier – Protecting Data Throughout its Lifecycle
