

Advanced Workflows

GoAnywhere Advanced Workflows are projects you create in GoAnywhere Managed File Transfer (MFT) to schedule and automate file transfers and business processes through centralized management, security, and auditing. With Advanced Workflows, you can streamline and secure the exchange of data with your customers, trading partners, and enterprise servers. Advanced Workflows can also connect to almost any server or data source by using a wide variety of standard and secure protocols.

GoAnywhere's intuitive interface and extensive workflow features help organizations eliminate the need for traditional file transfer scripts, single-function tools, and cumbersome manual processes.

Through Advanced Workflows, you can schedule projects to run at future dates and times using our built-in scheduler. An integrated file monitor can also be set up to detect new, modified, or deleted files in target folders, or you can deploy GoAnywhere to the cloud (Amazon EC2 or Microsoft Azure) to automatically pull/push files to a shared folder.

PRODUCT SUMMARY

KEY FEATURES

- Definable multi-step workflows with 100+ available tasks
- Connection to a wide variety of servers for exchanging data using standard protocols
- Integration with existing applications and programs using commands and APIs
- Cluster installations for scalability and active-active high availability
- Alerts or files sent to your email whenever triggered events occur

Encryption & Compression

- AES • FIPS 140-2 Compliance
- GPG • Open PGP • SSH • SSL
- TSL • ZIP, GZIP, TAR

Connectivity

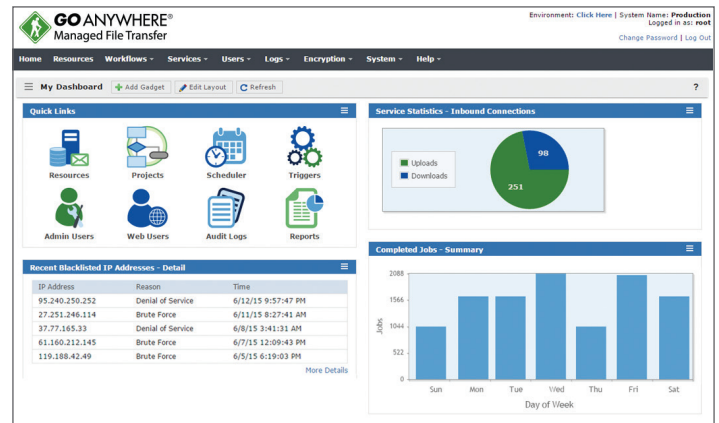

- AS2, AS3 & AS4 • Amazon S3
- Azure Blob Storage • FTP/FTPS
- GoFast Acceleration • HTTPS
- ICAP for Antivirus and DLP
- Message Queue • PeSIT • REST
- SFTP/SCP/SSH • SMB/CIFS
- SMS Texts • SMTP/POP3/IMAP
- SNMP • SOAP • WebDAV

Databases

- DB2 • IBM DB2 for i • Informix
- MySQL • Oracle • PostgreSQL
- SQL Server • Sybase

Other features include:

- Reusable connections that can be selected from simple drop-downs
- Chainable tasks with no limit on how many can be used
- Interactive debugging for workflow projects
- The ability to export, import, and promote projects to previous versions
- Maintained compliance with detailed audit logs and reports
- ETL functions that allow data to be automatically transformed to/from databases, XML, Excel, CSV, and fixed-width text formats
- The ability to segregate users and administrators into separate security domains

Modern browser-based dashboard for administration.

What are others saying about us?

Many successful organizations across a variety of industries use and love GoAnywhere MFT. To see what they have to say about us, check out our customers' reviews on [Capterra](#) and [G2](#).
