

GoAnywhere Cloud Connectors

Integrate your file transfers with popular web and cloud applications easily

Your trading partner requests an important file, and you need to share it to a folder in Box. Or maybe you have contacts or billing information you need to update in Salesforce—and you want to do it automatically. For these things and more, we offer Cloud Connectors, a feature of GoAnywhere MFT that lets you easily integrate with the external cloud and web apps you use every day.

What are Cloud Connectors?

Cloud Connectors are built-in web and cloud integrations for your GoAnywhere MFT projects and workflows. We offer out-of-the-box connectors for popular services like SharePoint, Salesforce, Box, Dropbox, Google Drive, Google Cloud Storage, and Microsoft Dynamics 365.

HOW CLOUD CONNECTORS WORK

Cloud Connectors can be downloaded from our online marketplace. After downloading your Cloud Connector, you can configure its server connections and save it as a GoAnywhere Resource, where it is available to be reused in your workflows and cloud file transfers.

Cloud Connectors can integrate with any cloud or on-premises server using Web Services. Use this flexibility to create connectors of your own with GoAnywhere's drag-and-drop designer interface.

Get Fast and Simple Application Integrations with these GoAnywhere Cloud Connectors

GoAnywhere's Cloud Connectors automate the movement of data between on-premises and the cloud. We offer application integrations for these popular web and cloud services, and we're constantly adding more to the product.

Cloud Connector	Corresponding Features
SharePoint	Utilize SharePoint's document management, storage, and automation features.
Salesforce	Connect to Salesforce to access and update your contacts, billing, and commerce information.
Box	Transfer collaborative files and folders to Box, then manage how they're stored, accessed, and shared with partners.
Dropbox	Move files, create directories, read documents, parse data, and link Dropbox with other APIs and CRMs.
Google Drive	Transfer and manage files, and sync the latest versions of shared content in Google Drive.
Microsoft Dynamics 365	Automate and secure how you move business data to and from Microsoft Dynamics 365.

Secure your application file transfers today.

Get started with GoAnywhere MFT to see how we can protect your data in transit.
