Centralizing Secure MFT and EDI

GoAnywhere is a single solution for secure file transfer and electronic data interchange.

MFT Leader

GoAnywhere is the fastest-growing MFT product in the world.

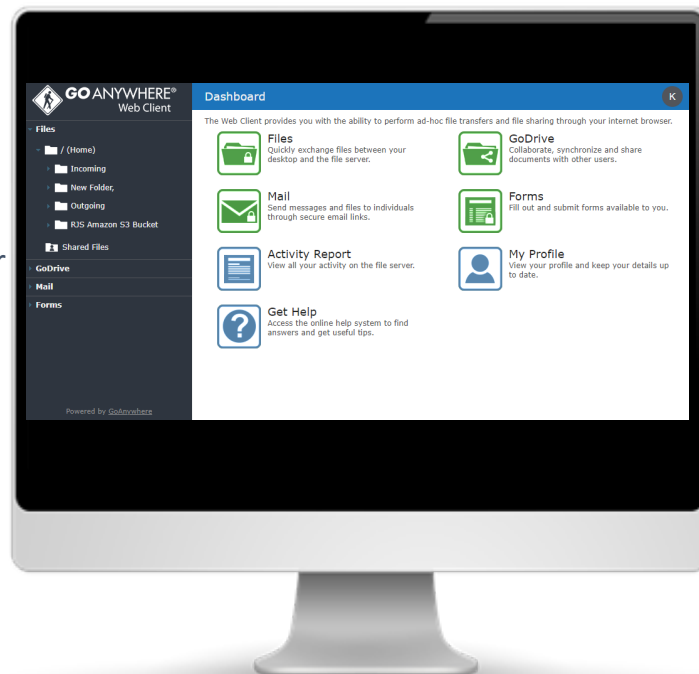

Secure Data Transfer

Simplify, automate, and secure file transfers with easy drag-and-drop workflows.

Data Integration

Cloud Connectors provide over 30 out-of-the-box integrations with popular applications.

Protocols & Encryption

Meets FIPS 140-2 AES encryption, uses OpenPGP standard, and supports popular protocols like SFTP, PeSIT, AS2, and more.

Visibility & Analytics

Browser-based interface provides customizable reporting and dashboards, and detailed audit logs.

Works on any OS

Deploy GoAnywhere on any operating system, on-premise or in the cloud.

What is AS2?

Applicability Statement 2

AS2 is a widely-used protocol for transporting data securely and reliably using digital certificates and encryption.

Encryption
End-to-end
encryption

Digital Signatures
Authenticate senders
and recipients

File Transfer Confirmation
Validate file integrity with
transfer confirmation

Drummond-Certified
AS2 integration
certification process

AS2 Client and Server in GoAnywhere

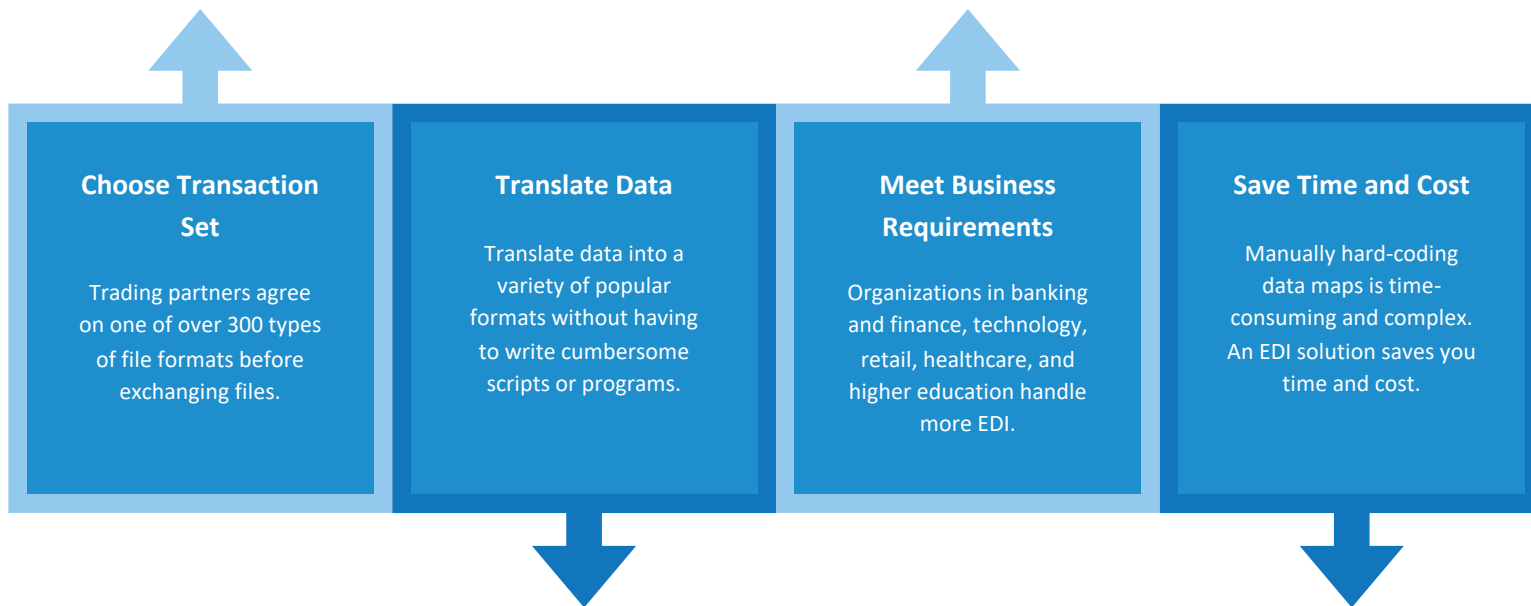

KEY FEATURES:

- ▶ Drummond-certified
- ▶ Send AS2 messages with multiple files, including EDI X12 and XML documents
- ▶ Automatic reconnection and retry
- ▶ Asynchronous and synchronous
- ▶ Authenticate with user credentials and x.509 certificates
- ▶ Audit log
- ▶ Graphical wizards
- ▶ Scale to handle unlimited AS2 partners

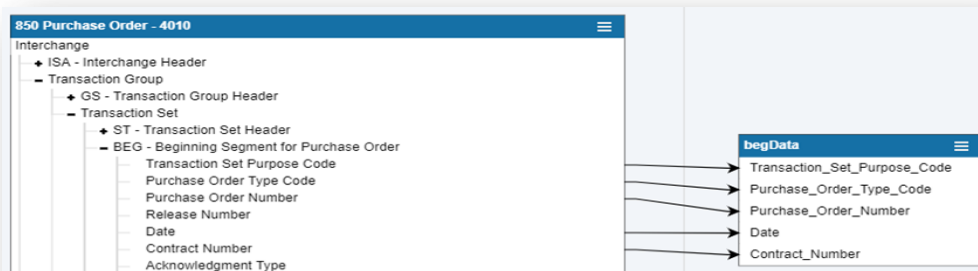

What is EDI?

Electronic data interchange is a flat file format that trading partners use to send and receive business transactions.
