## How to Use this Guide

This chapter explains how to use Tango/04 User Guides and understand the typographical conventions used in all Tango/04 documentation.

### Typographical Conventions

The following conventional terms, text formats, and symbols are used throughout Tango/04 printed documentation:

Convention	Description
<b>Boldface</b>	Commands, on-screen buttons and menu options.
<i>Blue Italic</i>	References and links to other sections in the manual or further documentation containing relevant information.
<i>Italic</i>	Text displayed on screen, or variables where the user must substitute their own details.
Monospace	Input commands such as System i commands or code, or text that users must type in.
UPPERCASE	Keyboard keys, such as CTRL for the Control key and F5 for the function key that is labeled F5.
	<b>Notes</b> and useful additional information.
	<b>Tips</b> and hints that will improve the users experience of working with this product.
	<b>Important</b> additional information that the user is strongly advised to note.
	<b>Warning</b> information. Failure to take note of this information could potentially lead to serious problems.

## Chapter 1

# Before You Begin

Database Settings Administrator provides essential tools to configure database connection settings for VISUAL Message Center products and setup database maintenance tasks.

VISUAL Message Center SmartConsole requires Database Settings Administrator to be installed in order to work correctly and therefore Database Settings Administrator is usually installed during the SmartConsole installation process. For further information please refer to the [VISUAL Message Center SmartConsole Installation Guide](#) for further details.

This document only explains the Database Settings Administrator installation process.

## Chapter 2

# Installation Steps

**From DVD:** If you are installing from the DVD, Select **VISUAL Message Center SmartConsole** and follow the prompts to complete the installation. If, for whatever reason, you must install using the Windows Explorer view, please contact your Tango/04 Business Partner for further assistance.

**From ZIP:** If you are installing from a downloaded zip file, double-click on the zip file icon, and follow the prompts. This will decompress the files into a temporary directory and start the install process.

### To install VISUAL Message Center Database Settings Administrator:

**Step 1.** The Database Settings Administrator Installation Wizard opens.

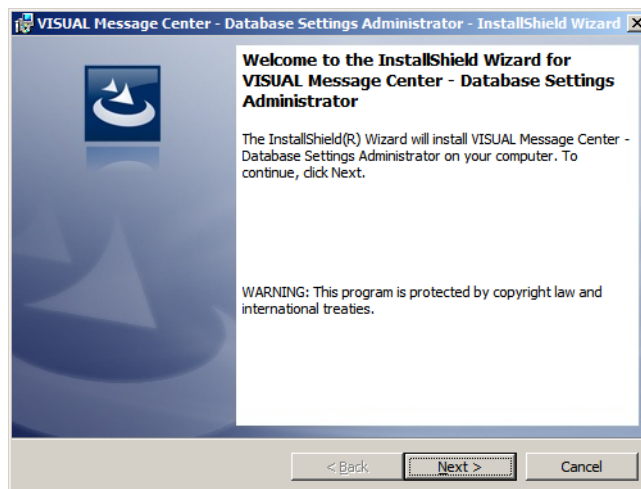

Figure 1 – Database Settings Administrator Installation Wizard

Click **Next** to begin the installation.

**Step 2.** The License Agreement window opens.

Read the License Agreement information and select the **I accept the terms in the license agreement** option button.

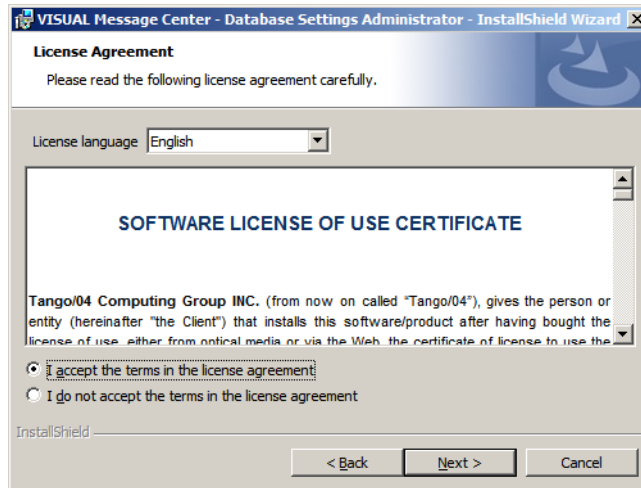

Figure 2 – The Software License agreement

Click **Next** to continue.

**Step 3.** Select the destination directory

Select the directory where you want to install the program files. The default directory is C:\Program Files\Tango04\DbSetAdmin, but you can change this here.

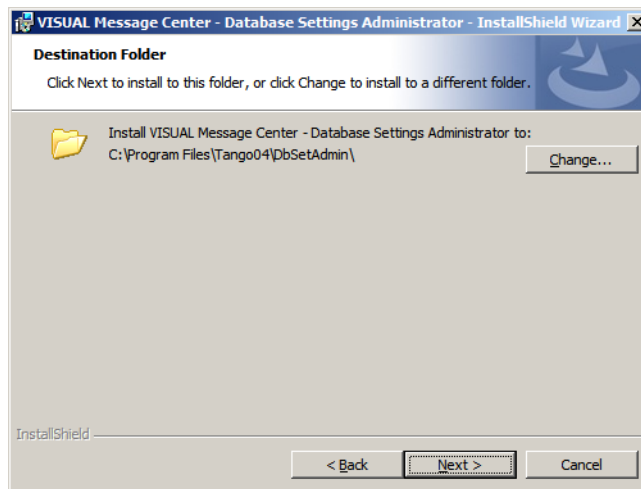

Figure 3 – Select destination directory

Click **Next** to continue.

**Step 4.** The Installation is ready to install the selected components.

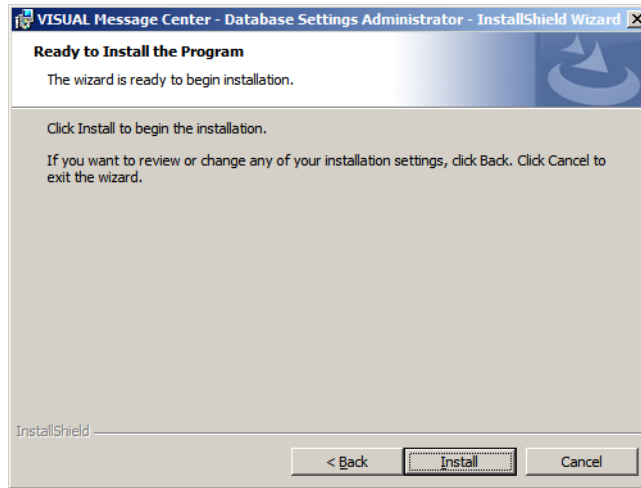

Figure 4 – Ready to install

Click **Next** to Continue.

**Step 5.** Installation finished.

When the installer has finished you will be presented with the following window.

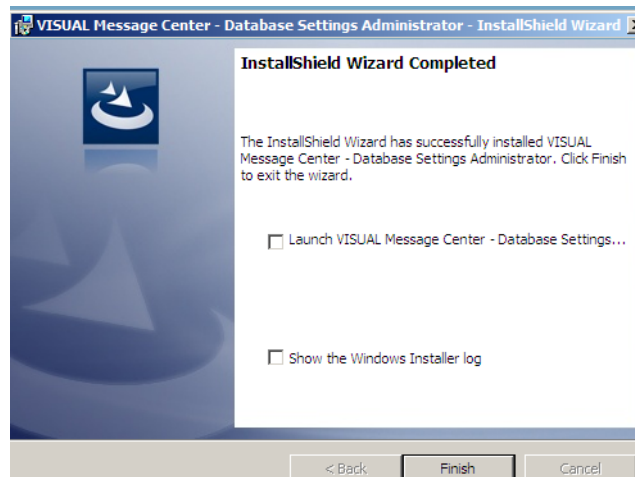

Figure 5 – Successful installation

Select the **Launch VISUAL Message Center - Database Settings...** check box to launch the program immediately after completing the installation process.

(Optional) Select the **Show the Windows Installer log** check box to see the logged messages concerning the installation.

Click **Finish** to exit the installation.

## Chapter 3

# Installation Summary

Before getting started with Database Settings Administrator we suggest you read the [Database Settings Administrator User Guide](#). It will help you understand how to get the most out of the program.

To quickly learn more about the many functions and tools available to you, we recommend a scheduled walk-through or conference call with your Sales Representative.

We hope that you enjoy working with Database Settings Administrator.

The first time you run Database Settings Administrator you are required to enter the settings needed to connect to AccessServer.

### To open Database Settings Administrator:

**Step 1.** Launch the application and enter the AccessServer connection settings.

If the **Launch VISUAL Message Center - Database Settings...** check box was selected at the end of the installation process (see [Step 5 on page 4](#)) Database Settings Administrator will be launched automatically.

The first time the application is run, you are required to enter the language for the application and the AccessServer connection settings in the window shown below in [Figure 6](#):

The screenshot shows the 'Database Settings Administrator' window with the following settings:

- Language:** English
- AccessServer:**
  - Hostname: 127.0.0.1
  - Port: 18081
  - Domain / PC: TANGO-RIC0S7ZMO
  - Rebuild AccessServer model
  - Access Server administrator, Domain or Pc\User: TANGO-RIC0S7ZMO \aserver
  - Password: [masked]
  - Administrator Actor: User

Figure 6 – Database Settings Administrator initial Settings window

**Step 2.** Enter the connection details in the Settings window. These settings can be changed at any time in the Settings tab, for further information please refer to the [Database Settings Administrator User Guide](#).

**Step 3.** Click **Save** to save the settings and proceed.

**Step 4.** Log in to AccessServer

Enter the user name and password in the fields provided for the *Security Administrator* to connect to AccessServer.

**Click Log in** to continue.

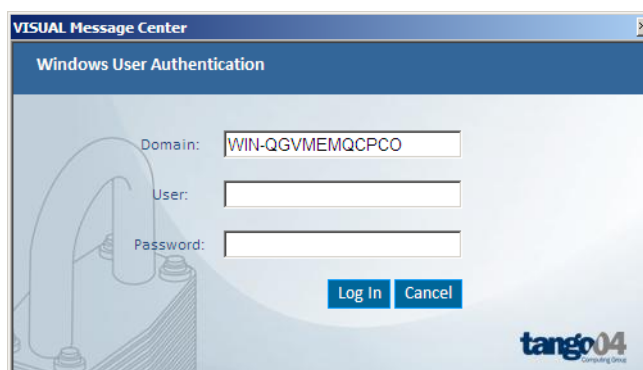

Figure 7 – Enter the AccessServer user credentials

**Note**

Database Settings Administrator can be launched at any time:

Click **Start > All Programs > VISUAL Message Center > Database Settings Administrator > Database Settings Administrator**.
